COMPACT
Pool enclosures

Combination of supreme **elegance** and extreme **durability.**

- »» **Our manufacturing operations already have a 17-year tradition.** We design and manufacture enclosures for swimming pools, pergolas, shelters and verandas. We have customers in France, Sweden, Germany, the United Kingdom, Poland, Austria and many other countries in Europe. **With an annual manufacturing volume close to 5,000 enclosures, we rank among the largest manufacturers in Europe.**
- »» We have developed **our own construction of robust, extremely durable aluminium load-bearing profiles.** The polycarbonate panels are bonded with profiles using silicone sealant, which increases the strength of the entire enclosure.
- »» Our enclosures are decorative for any garden – they are characterised by **extraordinarily elegant, modern design.** We supply the profiles in silver, i.e. Elox – anodized, as well **as anthracite and bronze powder coat finish.** The panels are made of polycarbonate, exclusively with double-sided UV filter, either in 10 mm hollow, or 4 mm solid design. According to the customer's wishes, we deliver in transparent, smoky, or coloured design. All the plastic parts are made of UV stabilized material.
- »» We manufacture **various types of enclosures with all imaginable types of arches and diverse heights:** from the lowest, flat design enclosures, to the very high and fixed enclosures suitable for the foothill areas.
- »» The option to **move the panels with a single finger, child safety locks, entrance doors according to the customer's wishes,** etc. are a matter of course.
- »» We are holders of the ISO 9001:2008 certificate. Our manufacturing process is monitored by TZÚS, TÜV and the French safety standards AFNOR.
